Art Unit: 1652

DETAILED ACTION

Status of the Application

Claims 2, 6, 13, 20-21, 33-34 are pending.

Amendment of claims 2, 6, and cancellation of claims 7-12, 14-19, 22-32, 35-40 in a communication filed on 2/11/2004 are acknowledged.

In a telephone conversation with Ms Mary Wilson on 3/3/2004, an agreement was reached to amend claim 6 and 33 to place the application in condition for allowance.

Examiner's Amendment

- 1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 2. Authorization for this Examiner's amendment was given in a telephone interview with Ms Mary Wilson on 3/3/2004.
- 3. Please replace claim 6 as follows:
 - 6. A variant secPHEX consisting of the secPHEX of claim 2 wherein the glutamic acid residue corresponding to position 581 of SEQ ID NO: 1 has been substituted with a valine residue.
 - 33. A method for obtaining a Phosphate Regulating Gene with Homologies to Endopeptidases on the X chromosome (PHEX) ligand comprising the steps of:

contacting a sample containing one or more molecules with a secPHEX as defined in claim 2 under conditions such that binding of said one or more molecules with PHEX can occur; detecting said binding as an indication of the presence of a PHEX ligand in said sample; and

selecting said PHEX ligand.

Application/Control Number: 09/913,955

Art Unit: 1652

Reasons for Allowance

4. The following is an Examiner's statement of reasons for allowance. Although the prior art discloses a human phosphate regulating gene with homologies to endopeptidases on the X chromosome (PHEX) protein having the amino acid sequence of SEQ ID NO: 1 (Guo et al.; cited in the IDS and previous Office Actions), the Examiner has found no teaching or suggestion in the prior art directed to a polypeptide having the amino acid sequence of SEQ ID NO:1 modified so that amino acid residues 27-46 have been replaced with the amino acid residues set forth in SEQ ID NO: 4. Therefore, claims 2, 6, 13, 20-21 directed to a polypeptide or composition thereof, wherein said polypeptide comprises the amino acid sequence of SEO ID NO: 1 modified so that amino acid residues 27-46 have been replaced with the amino acid residues of SEQ ID NO: 4, and claims 33-34 directed to a method of use of said polypeptide are allowable over the prior art of record.

- 5. Claims 3, 6, 13, 20-21 and 33-34 are allowed.
- 6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Delia M. Ramirez whose telephone number is (571) 272-0938. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Ponnathapura Achutamurthy can be reached on (571) 272-0928. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1234.

Delia M. Ramirez, Ph.D.

Patent Examiner
